

Joshua Lin

(631) 813 - 0971 • 38 Fifty Acre Road South, Smithtown, New York 11787 • jl3205@georgetown.edu • [linkedin.com/in/jlinnnn](https://www.linkedin.com/in/jlinnnn)

EDUCATION

GEORGETOWN UNIVERSITY, GRADUATE SCHOOL OF ARTS AND SCIENCES

Washington, DC

Master of Science, Data Science and Analytics

Aug 2024 – Dec 2025

- **GPA:** 3.933 | Returning Student Scholarship Recipient
- Teaching Assistant (DSAN Summer Bootcamp; DSAN 5100 Probabilistic Modeling)
- DSAN Graduate Peer Mentor
- Relevant Coursework: **Data Science & Analytics, Data Visualization, Statistical Computing, Neural Networks & Deep Learning, Applied Time Series, Big Data & Cloud Computing**

NEW YORK UNIVERSITY, COLLEGE OF ARTS AND SCIENCE

New York, New York

Bachelor of Science, Mathematics

Aug 2019 – May 2023

- Coursework: **Probability, Combinatorics, Discrete Mathematics, Real Analysis, Data Structures**

PROJECTS

U.S. Airline Performance Analysis

Dec 2025

SQL, Python, Pandas, Matplotlib

- Analyzed **600,000+ U.S. DOT flight records** using SQL to extract and validate operational KPIs
- Identified performance trends and anomalies (delays, cancellations, peak travel periods) through advanced SQL queries and exploratory analysis
- Built visualization and summary reports translating performance metrics into **decision-ready insights for stakeholders**

DeepVAR: Portfolio Risk Forecasting Dashboard

Apr 2025

Python, Streamlit, Pandas, NumPy, Matplotlib

- Built an interactive dashboard enabling users to assess **10-day portfolio risk (VaR)** through probabilistic forecasts
- Engineered an end-to-end data pipeline from raw return data to validated risk metrics and real-time visualizations
- Modeled cross-asset relationships to improve portfolio-level risk estimation and scenario analysis

Fatal Compassion: Global Incident Risk Analysis

Apr 2025

Python, Scikit-learn, Pandas, Plotly, Quarto

- Analyzed **4,000+ global incident records across 75+ countries** to identify geographic and operational risk patterns
- Designed interactive dashboards and geospatial visualizations highlighting escalation trends and high-risk regions
- Applied statistical testing and predictive indicators to simulate real-time alerting and support risk-informed planning

NLP-Based Bias Detection in News Headlines

Dec 2024

Python, Scikit-learn, Text

- Examined 1,000+ news articles and headlines using the New York Times API to evaluate bias in geopolitical reporting
- Applied NLP techniques (sentiment, polarity) and classification models to detect narrative bias in text data
- Identified linguistic patterns in media framing and communicated findings through data visualizations and statistical analysis

DataPulse - Customer Segmentation & Reporting (Hackathon)

Mar 2024

Python, Pandas

- Segmented **10,000+ retail customer records** to identify behavior-driven loyalty groups
- Built dashboards visualizing customer segments and engagement patterns in real time
- Collaborated in a fast-paced environment to translate analytical outputs into actionable product insights

TECHNICAL SUMMARY

Data Analysis & Reporting: SQL, Excel, Python (Pandas, NumPy), Data Wrangling, KPI Definition, Data Validation, Data Quality Checks, Relational Databases

Visualization & BI: Tableau, Streamlit, Matplotlib, Seaborn, Plotly, Quarto, Dashboard Design

Statistical & Analytical Methods: Statistical Inference, Hypothesis Testing, Regression, A/B Testing, Time Series Analysis

Advanced Analytics: Predictive Modeling, Machine Learning (Supervised & Unsupervised), Clustering, Geospatial Analysis

Programming & Platforms: Python, R (tidyverse, ggplot2), Git/Github, HTML/CSS, JavaScript

Certifications: Google Data Analytics

Languages: Mandarin (fluent), Spanish (beginner)

PROFESSIONAL EXPERIENCE

LOUIS LI CPA PLLC

Queens, NY

Accounting & Audit Support Assistant

Dec 2025 – Jul 2026

- Collected, validated, and organized client financial documents to ensure data completeness and accuracy for tax preparation and audit review
- Assisted with bookkeeping and audit support by categorizing transactions in QuickBooks, performing reconciliation checks, and flagging discrepancies for CPA review

Astera Holdings
Software Engineer Intern

Remote, NY
Sep 2025 – Dec 2025

- Diagnosed and resolved production UI issues by simplifying conditional render logic, improving application stability and user experience
- Collaborated with product stakeholders to implement and ship a stable, full-screen chat interface, reinforcing end-to-end system reliability

API Global Solutions
Accounts Receivable Specialist

Melville, NY
Jun 2025 – August 2025

- Maintained and reconciled structured financial records using Excel to support revenue tracking and discrepancy resolution
- Coordinated with corporate travel vendors to validate hotel folios and ensure accurate documentation across internal systems

ADDITIONAL INFORMATION

Community: Martha's Table Volunteer, R Gov Volunteer, Volunteer for the NYC Half-Marathon
